**PHP Developer - Wordery**

*Location: Farnborough (Hampshire) or Norwich (Norfolk)*

**About Wordery**

Founded in 2012 by five friends; Wordery has grown to become the UK’s *favourite* and *fastest-growing* online bookshop. Our proposition is simple; to offer the best range of books, at the best possible prices, to book-lovers all over the world. We achieve this through our award-winning website; [wordery.com](http://wordery.com) and our presence on key marketplace platforms such as Amazon and eBay (all powered by our own self-built technology). Our vision is to elevate and grow our well-maintained position as a trusted, reliable online bookseller – where book-buyers *always* find what they’re looking for.

**Job Description**

Wordery is looking for a talented PHP Developer to join the expanding Development Team. As a key member of an agile team, you will be responsible for producing clean, scalable and maintainable code in order to grow our bespoke eCommerce platform.

Reporting to the Development Lead, you will work closely with your colleagues within the Development Team (PHP and front end developers), as well as Business Operations, Marketing, and Design throughout the project lifecycle.

By joining Wordery you will be a driving force in accelerating the development of the eCommerce platform in order to offer our customers a better experience and to boost sales.

**Who Are We Looking For?**

The ideal candidate must be a self starter who can hit the ground running, who thrives in a busy agile environment. Customer focused with a good understanding of what makes (and breaks) a great eCommerce experience. You will have SOLID principles, design patterns, and know how to apply them to real world problems.

**Technologies We Use**

- PHP 7
- MySQL
- React
- GraphQL
- Git & Gitlab
- Jira
- ElasticSearch
- Jenkins

---

Wordery.com Ltd, Arena Business Centre, 282 Farnborough Road, Farnborough, GU14 7NA
